

Listing of Claims

Claim 1 (currently amended)

A resilient, elastic, dimensionally dynamic mobile product of adhesive wood joinery complete in itself without fasteners, joinery millwork, or supporting structures wherein said product of joinery comprises a ~~layer~~ substantially resilient, elastic, dimensionally dynamic, and mobile ~~material~~ forming an adhesive joint between two or more the individual wooden elements, wherein adjacent edges of the individual wooden elements contact each other wherein an individual wooden element is a single piece of wood more than one fiftieth of an inch thick and more than one eighth of an inch wide and more than two inches long, and wherein a joint is a means of holding individual wooden elements in their correct positions relative to one another, ~~and wherein a layer is a thickness of material greater than 0.~~

Claim 2 (original)

The joinery of Claim 1 wherein the joints exhibit hinge like flexibility.

Claim 3 (original)

The joinery of Claim 1 wherein the individual wooden elements move freely and independently of each other.

Claim 4 (cancelled)

Claim 5 (original)

The joinery of Claim 1 wherein the wooden elements joined are not displaced permanently by impact or expansion but are drawn back to their original position.

Claim 6 (original)

The joinery of Claim 1 wherein the wooden elements joined need not be precisely milled or fitted for a perfectly tight joint to be formed.
